[Click here](#) for full download instructions

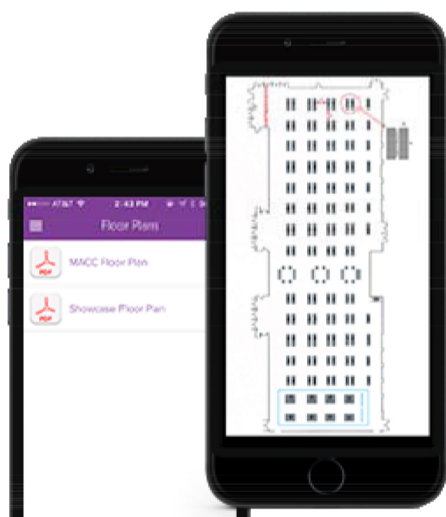

Here's what you can expect from the app:

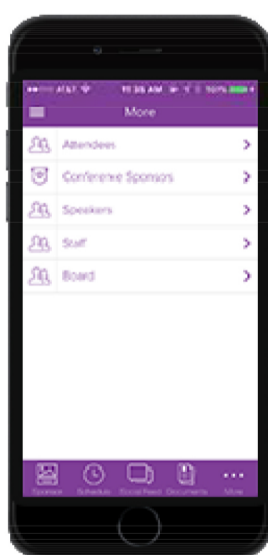

The Conference Mobile App has the full agenda and will be updated with any changes as they happen. You can customize your personal agenda by adding any event to "My Schedule." Just tap an event to view its details and select "Add Event to My Schedule" to do so. On the same screen you also have the option to **rate events and leave any additional comments for WF&FSA staff to review later.**

In the Social Feed section you'll be able to **share thoughts, comments and photos** about the Conference as you experience them. Think of it as Facebook that only Conference attendees can view! You can also like or comment on posts made by others. We encourage everyone to post and some of the best will be highlighted in the *Conference Daily* emails!

Make sure you know where to go while moving about the property by using the **Floor Plans** section of the App. Once you select a floorplan you will have the ability to zoom in and out to make reading them much easier.

The app also features the **attendee list, speakers bios, a listing of our Conference sponsors, WF&FSA staff and much more.** To see all the additional App functions tap "More."

Enjoy the Conference!
